How It Works

Every square on a picture page holds a number from 1 to 6, and each number stands for one mark. Draw the mark for each number right over the number in its square. Square by square, a cat appears out of the grid.

Ink paws

The paws at the top of each picture show how much pen work it takes compared with the others in this book. Every picture has the same number of squares, but some need more strokes than others.

Tips

- One fine black pen is all you need. A 0.3 to 0.5 mm fineliner works well.
- Work row by row, or one block at a time. The darker lines every five squares help you keep your place.
- Slide a sheet of card behind the page in case your pen bleeds. Every picture has a blank back for the same reason.
- The finished pictures are at the back of the book, if you want to check your work.
